

One Platform

Engineering excellence. Building a better tomorrow.

UNIFIED PLATFORM ROADMAP · ORENA SOLUTIONS

THE VISION

One Platform.

Integrating **Moodle** and **Mentza** into Orena builds a unified connector roadmap for **Hiring**, **Training** and **Culture Transformation**.

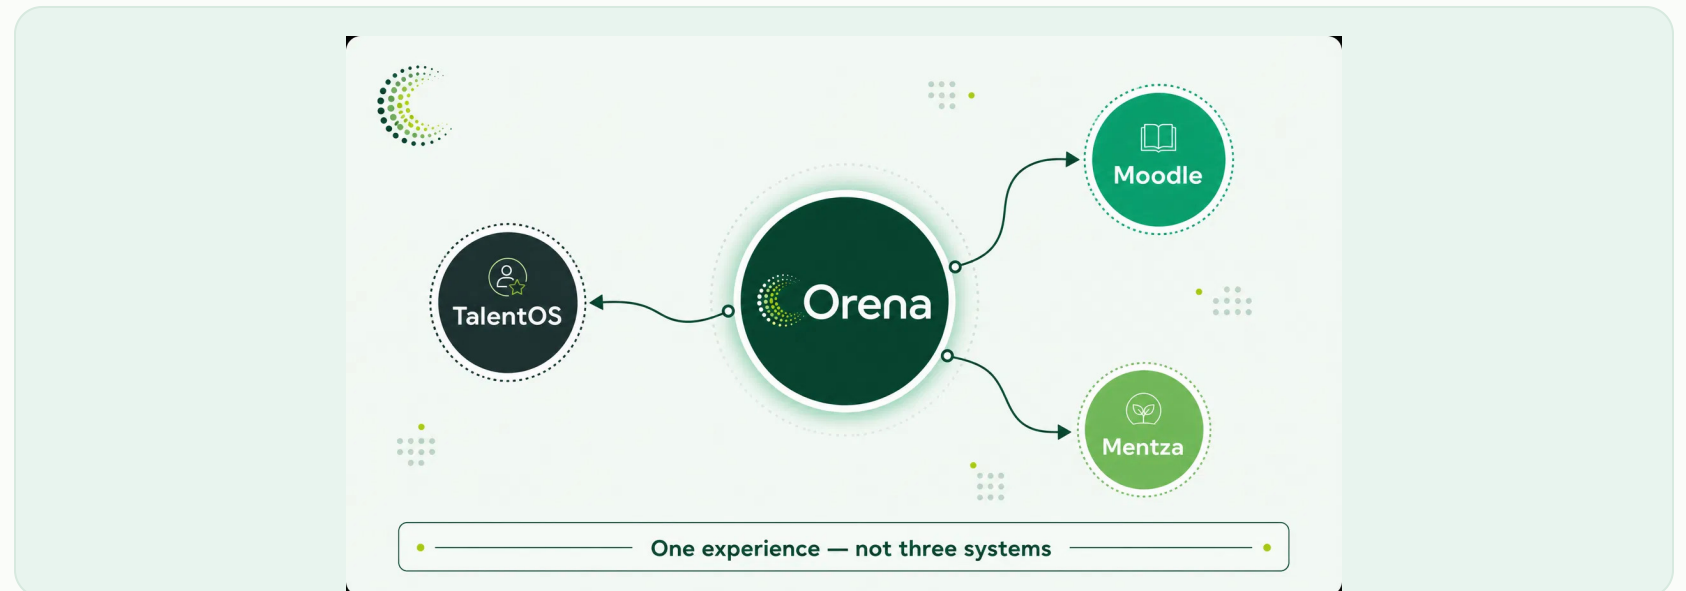

● Hiring

● Training

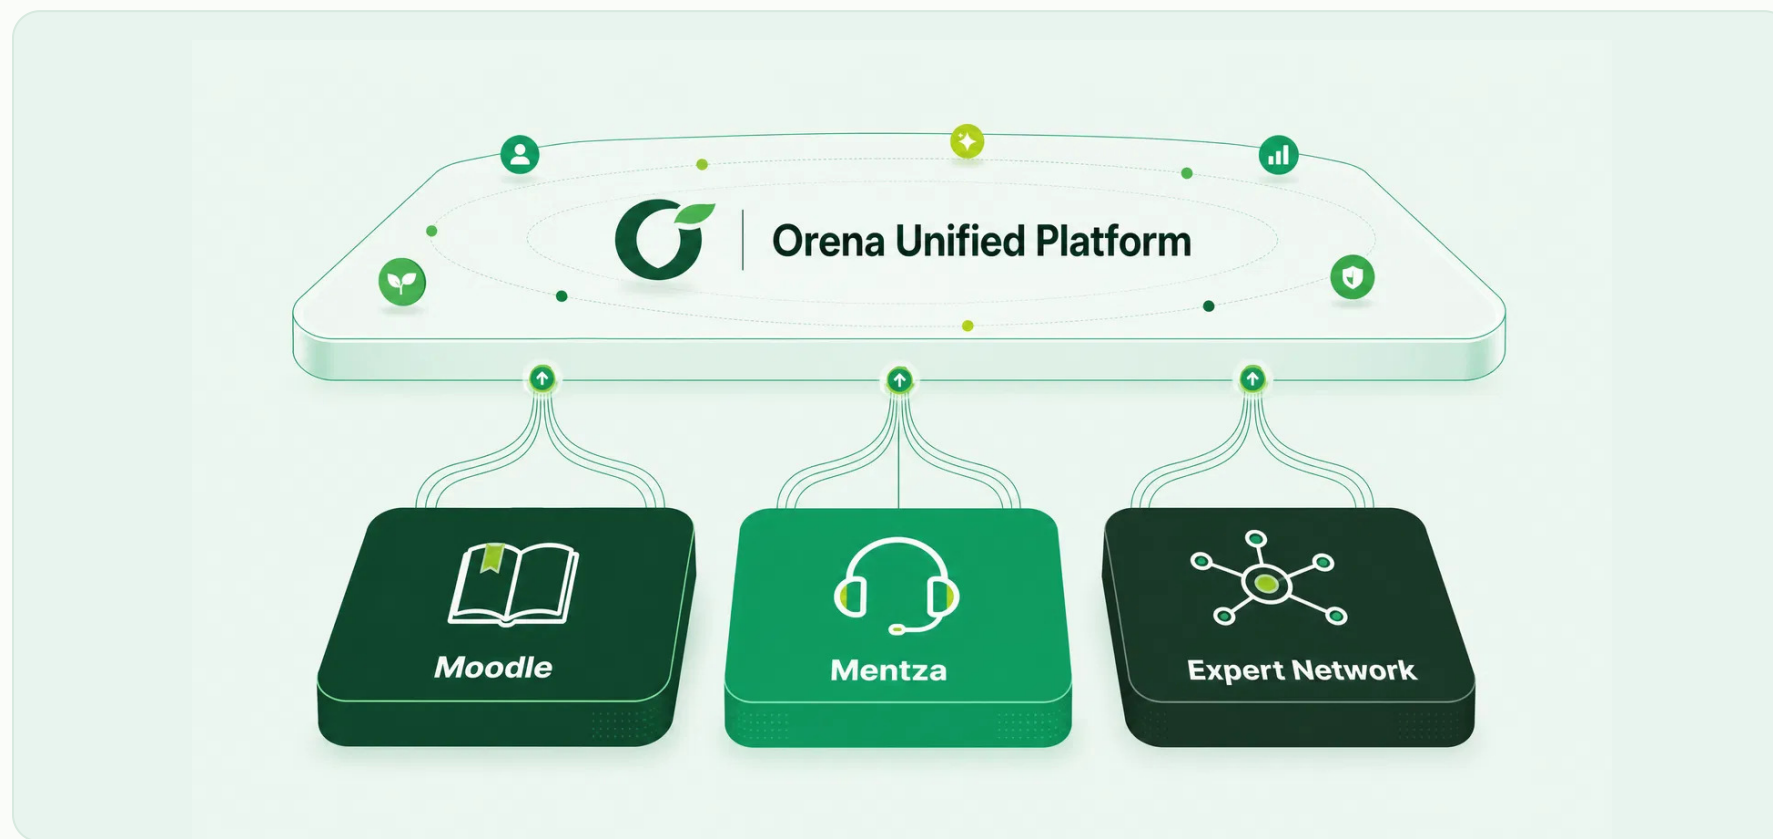

● Culture

Company. Candidate. Student.

One experience — not three systems.

Three powerful engines drive one seamless experience.

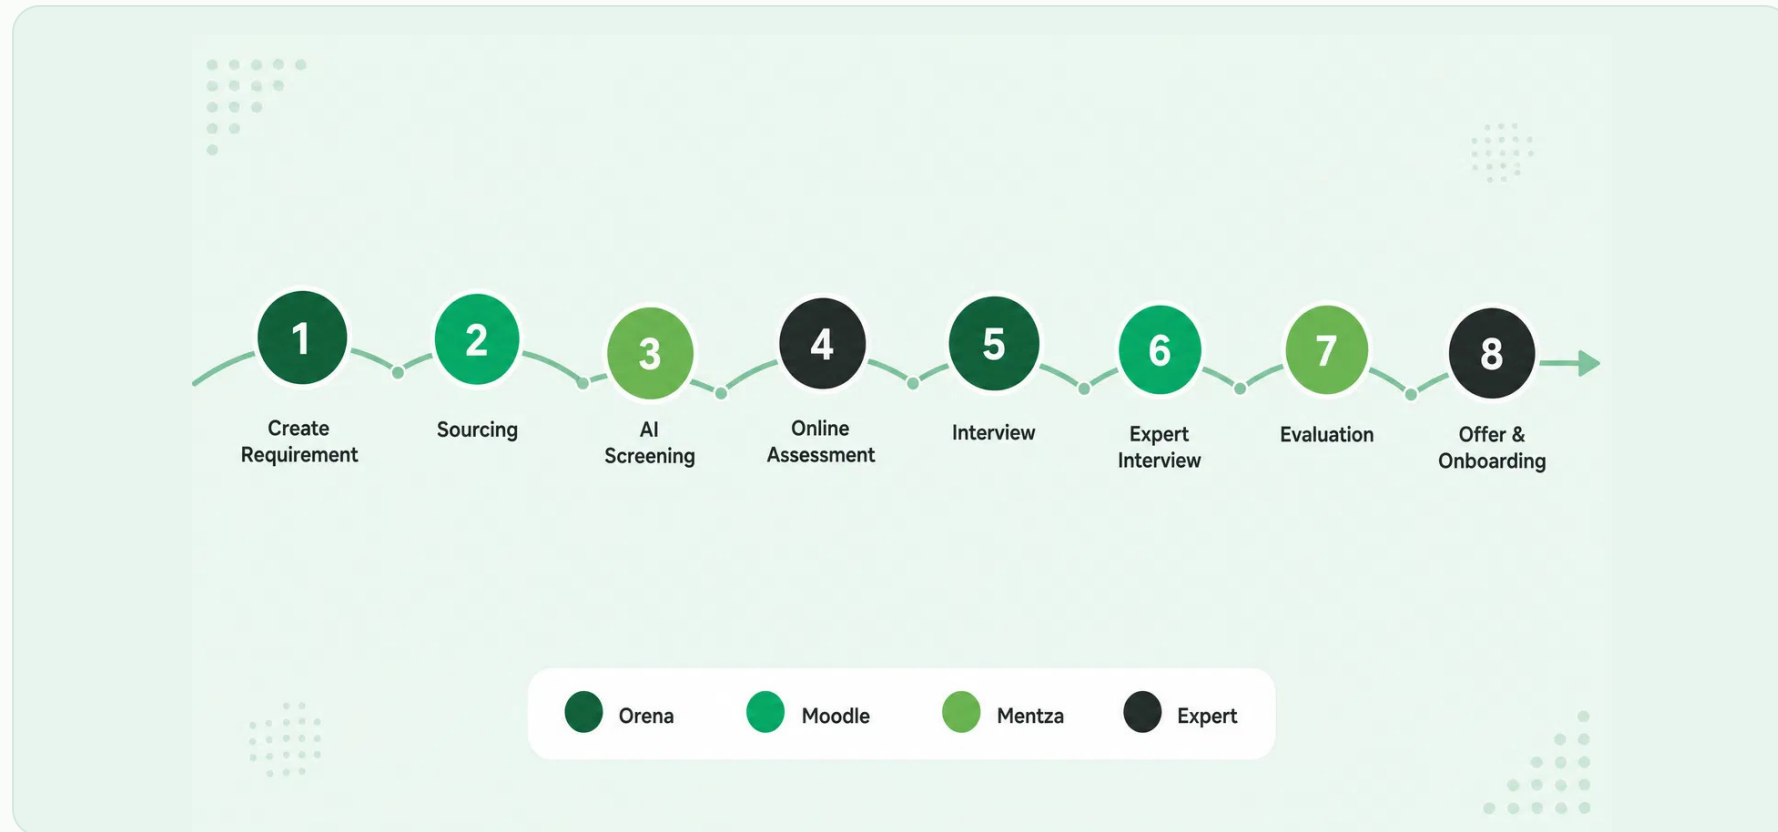

● **Moodle** · Training & LMS delivery

● **Mentza** · Expert sessions & mentoring

● **Expert Network** · Curated talent & evaluation

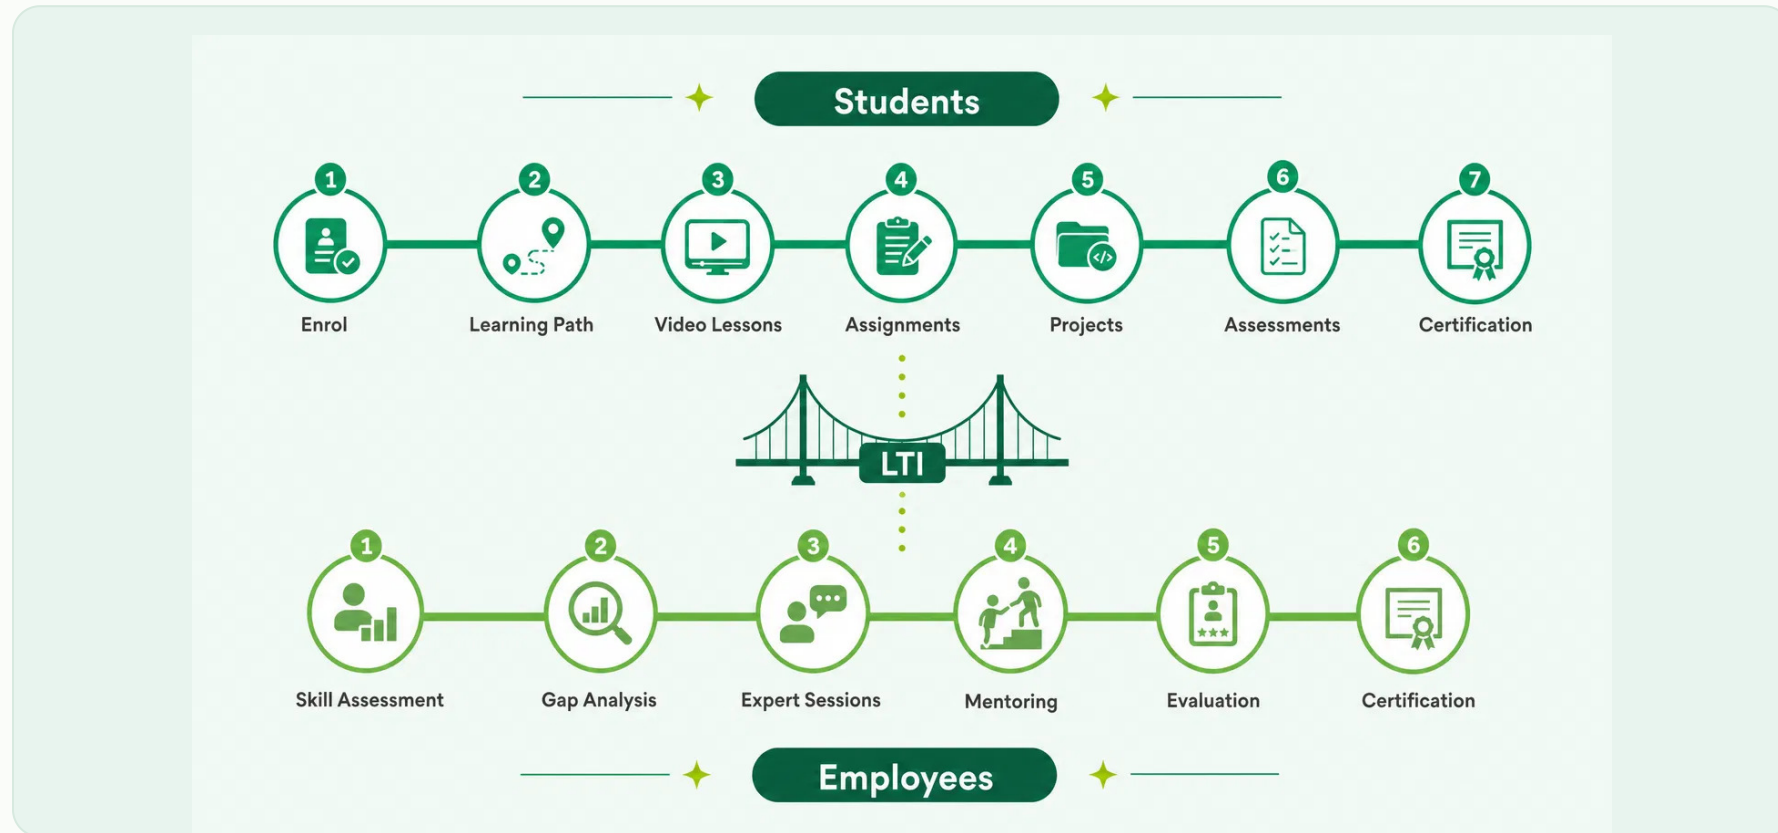

Company. Candidate. Student. **One experience — not three systems.**

End-to-end recruitment across all four systems.

Eight steps. Four systems. **One seamless journey — requirement to onboarding.**

Dual-track learning — students and employees on one platform.

The LTI bridge carries Mentza's OSA Gap Analysis scoring straight into Orena.

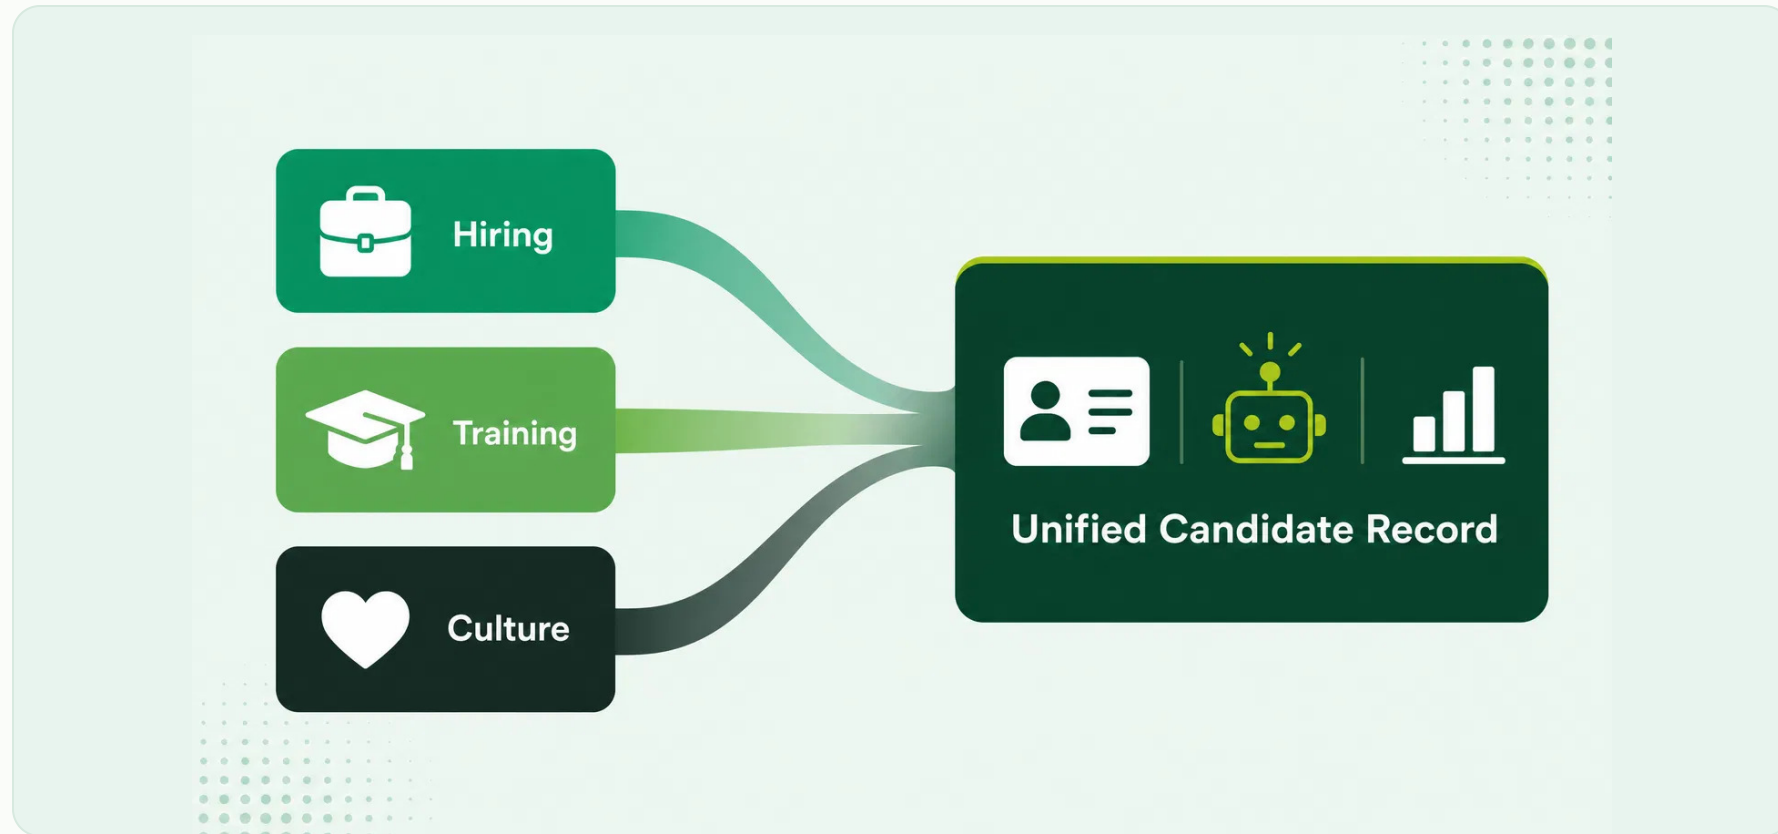

A human-led journey that flows into measurable insight.

Fully human-led — no Moodle or Mentza integration required for this pillar.

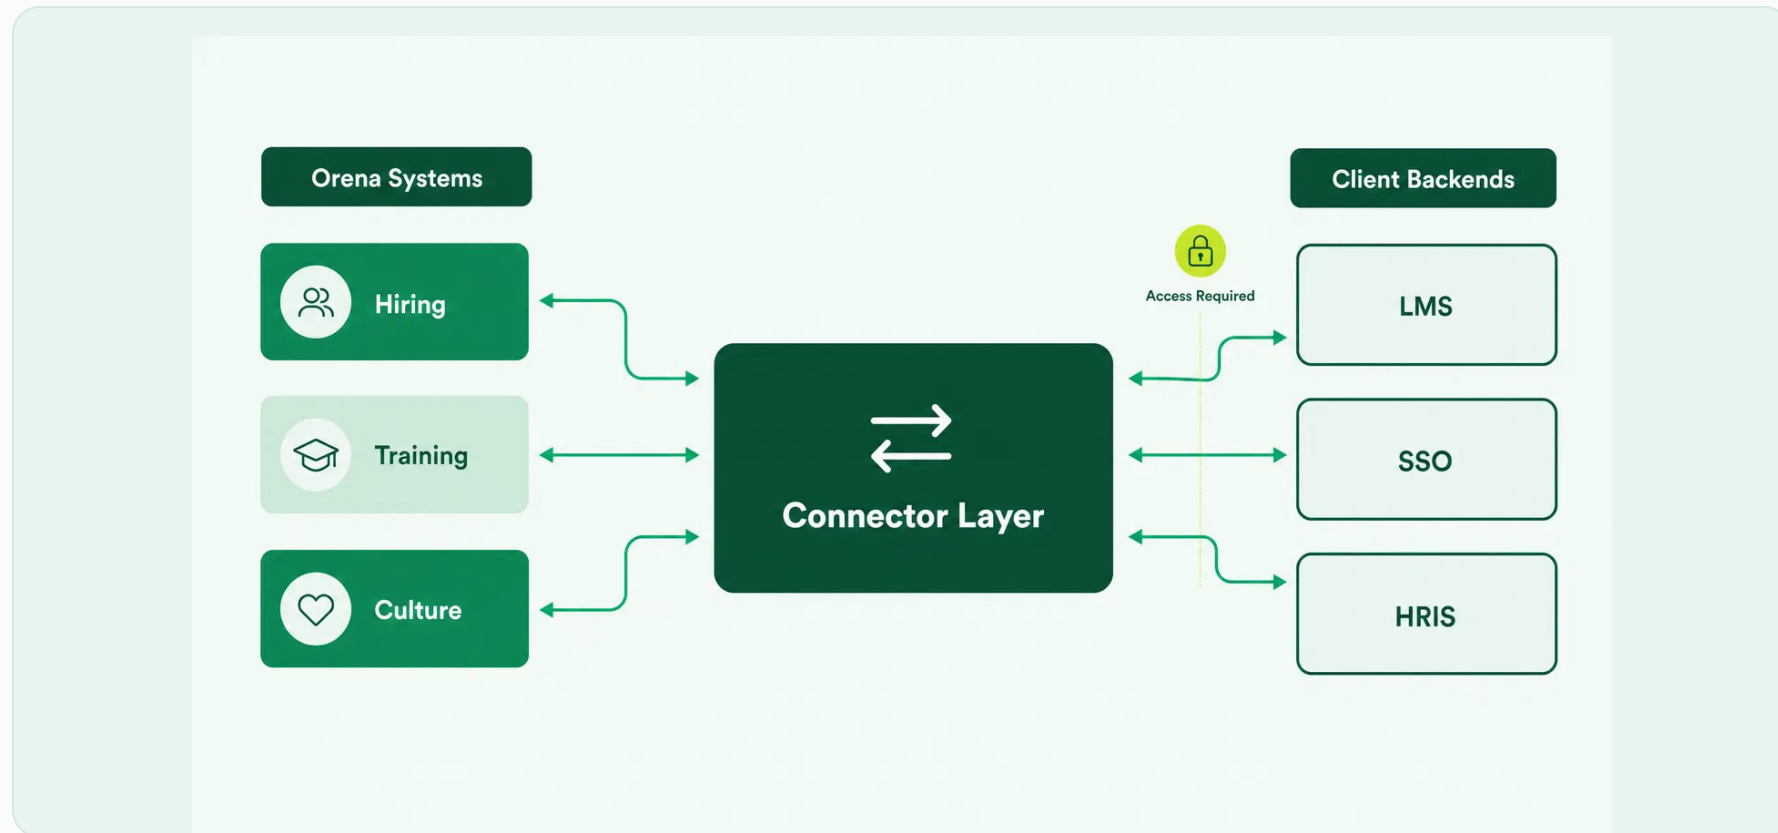

THE CONVERGENCE

Every pillar feeds one unified candidate record.

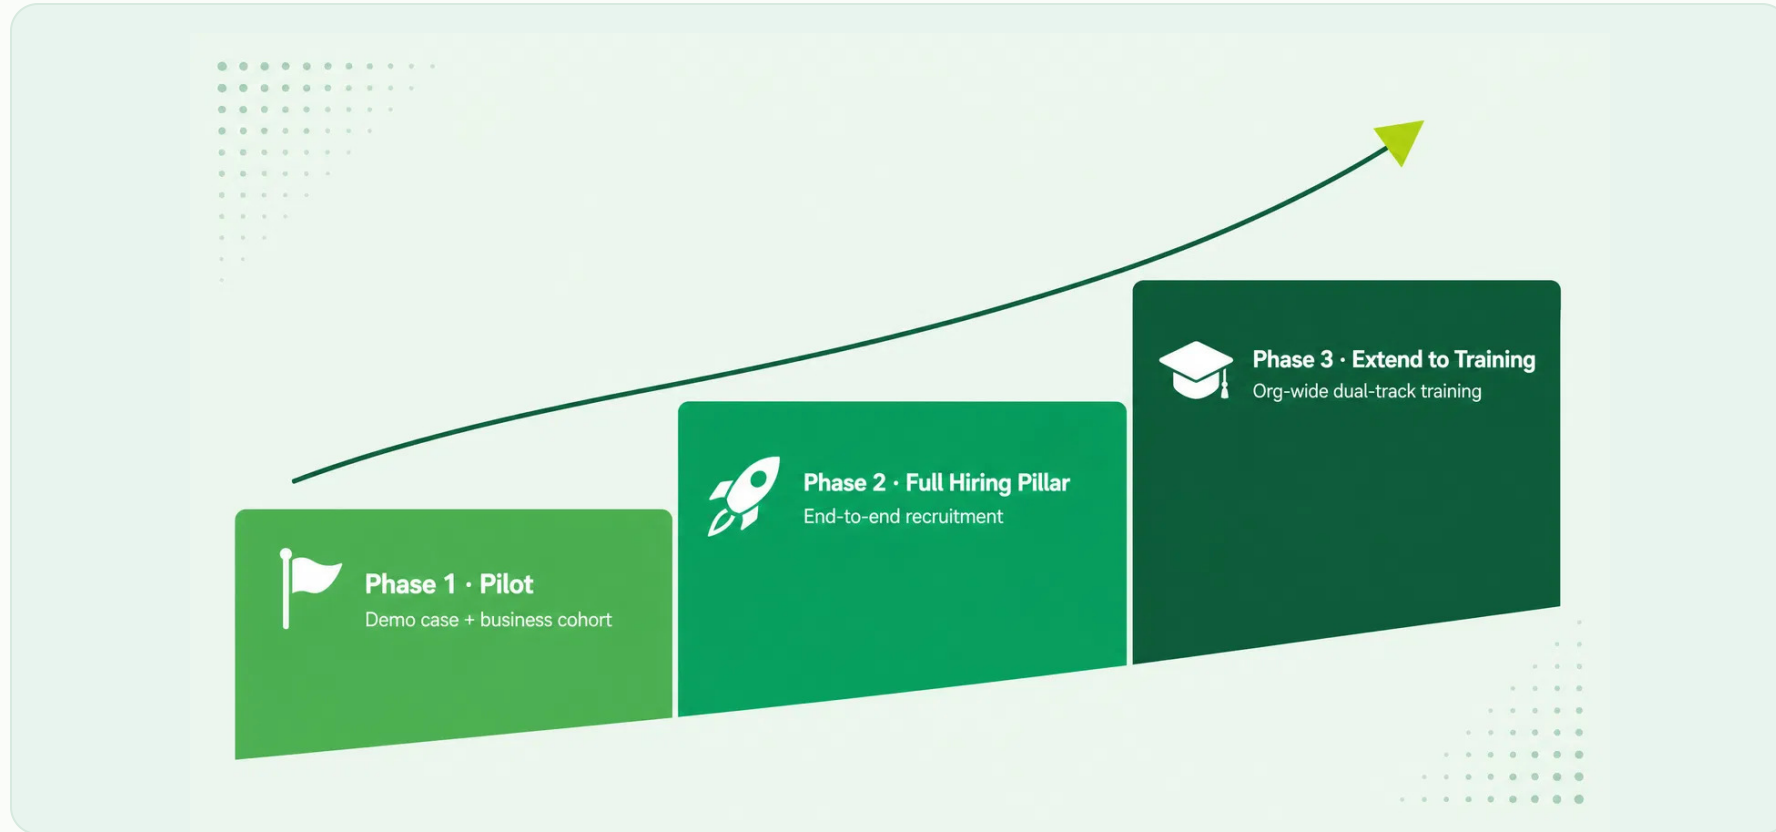

One dashboard. One record. **Every pillar feeds it.**

One connector layer links Orena to every client backend.

Client-side access **unlocks the entire build.**

A phased rollout — proven momentum at every step.

Each phase validates the layer **before the next one scales** — low risk, proven momentum.

NEXT STEPS

Unlocking Phase 1 takes three dependencies.

1

Moodle Backend Access

Credentials provisioned to commence the technical audit.

2

Mentza Scoping Conversation

Direct technical dialogue with the Mentza development team.

3

Resourcing Sign-off

Timeline approved and engineering resources allocated for the pilot build.

READY WHEN YOU ARE

Deploy Phase 1 Pilot

One demo case. One business cohort.
Validated, then scaled.

Launch the Pilot
