

ACCOUNTS PAYABLE AUTOMATION

 Ledger

Stop keying in invoices by hand. Let every one be read, checked, and given a *verdict* — automatically.

Send Ledger a vendor invoice and it reads every field, finds the matching purchase order on its own, and checks the two line by line. Your team gets a clear pass, a flag for review, or a rejection — with the reason spelled out — instead of hunting through spreadsheets and email threads.

READS ANY INVOICE

Clean PDF or a photo from a phone — Ledger reads it and flags anything it isn't fully sure about, so you know exactly what to double-check.

FINDS THE RIGHT PO

No searching, no manual matching. Ledger finds the matching purchase order on its own and links the two together.

CHECKS EVERY DETAIL

Vendor, totals, currency, line items, approvals — all compared automatically, with every mismatch called out plainly.

KEEPS A CLEAN RECORD

Every edit is logged — who changed what, and when. Once an invoice passes, it's locked, so your numbers stay trustworthy.

CLIENT FEEDBACK

★★★★★

“Cut our invoice cycle from three days to under four hours. Every correction is logged automatically — our auditors love it.”

Priya Deshmukh
Finance Controller, Kanchan Industries

★★★★★

“PO matching flagged duplicate invoices worth ₹4.2L in the first month alone — it paid for itself before onboarding finished.”

Arjun Nair
AP Lead, Vertex Auto Components

★★★★☆

“The confidence scores mean my team only touches invoices that actually need a human eye. Everything else moves itself.”

Kavita Rao
Head of Accounts, Northline Manufacturing
