

Skills Enhancement Courses in India by Orena Solutions

(Crafting Preferred Engineers)

Vision

To equip people with employable skills through Industry Adaptable Courses and Universities & also to create innovative culture in society.

Mission

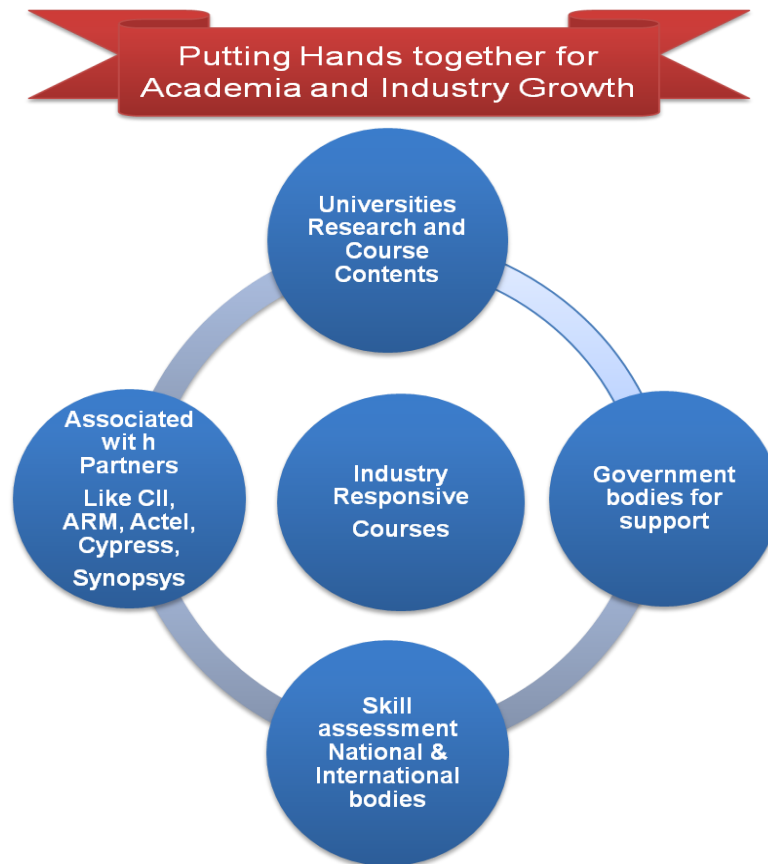

Goals

- ✓ Training for Skilled based courses – (high end to low end, mainly technical) to make freshers Industry Ready
- ✓ Research Projects within the center and in Collaboration with Universities / Professors
- ✓ Catering to Business needs focusing Indian & Global Market
- ✓ With the help of trainees, we can also support them with some Research related activities
- ✓ Short term training programs be conducted on regular basis based on business requirements from Corporate houses

- ✓ Higher qualification can be imparted to Current Employees.

Operating Model

Programs offered:

Masters & Research:

Masters Program with the tie up of University. Students can be doing projects with us (on / off campus based on our rules).

Setting up of Research Lab / Centre in the state leading to Incubation and Entrepreneurs Development. This lab should provide Research facility and also should provide Consultancy space. Also, Collaborations done with universities for faculties working with our Research topics. It can also lead to IPs & Patents

Finishing School Courses (Degree level)

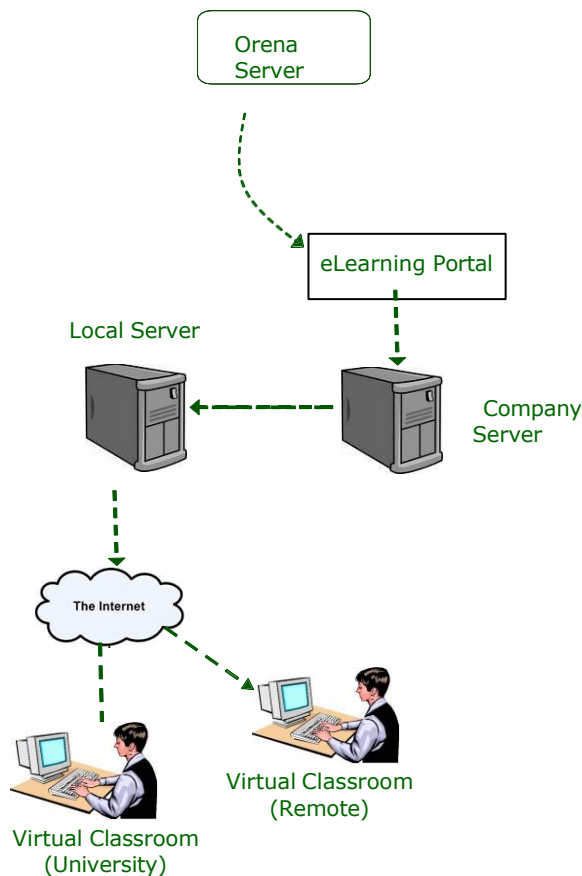

Filler courses and other skillful courses to be taught at Bachelors level at end of each Semester. They should be able to get employed at Industry, benefit achieved at Masters Admissions or start with some product company. These needs to be all the extra level courses.

GIDC, ITI & Polytechnique:

The purpose of these courses will be for skill enhancements. These courses will be more on working knowledge to be imparted for the people with lower study to get absorbed in the industry. This is mainly to impart them skills for employability.

Further, participating colleges can avail our assistance with the following research activities:

1. Ph.D thesis supervision
2. Lab setup in various electronics disciplines
3. Adjunct faculty appointments
4. Assistance and collaboration with grant and research proposals

For Evaluation of Student Caliber:

1. Skill Matrix will be prepared based on the requirement suggested by industries i.e. gap identified for particular course based.
2. We should identify certain industries (3) + academic institutes (2) where the assignment / projects will be submitted and they will verify them (same process as Ph D thesis is reviewed)
3. The average of all of them combined and then submitted to specific industries along with the skill matrix
4. Every industry will have the facility to view those projects and assignments on our server

Tasks undergone by Orena:

1. Hiring of the freshers from Colleges
 - a. Conduction of Written Test
 - b. Coordination with Colleges / Universities
 - c. Interviews arranged with the support of Company Engineers
 - d. Release of Conditional offer letters with the support of HR of Company
2. Designing of the courses for the need of Company e.g. :
 - a. VLSI Domain
 - i. ASIC Design
 - ii. ASIC Verification
