

Bridging the Gap between Industry and Academia

The Workforce Growth Platform

Contents

Who we are, the platform we are building, and the track record behind it.

01 The Platform

The problem today, the idea, the three engines, the workflow and the Mentza partnership.

02 The Company

Vision, services, universities, clients and track record.

Orena Solutions

Orena Solutions builds the pipeline between raw engineering talent and the organizations who need it most — hiring, training and culture transformation, delivered as one connected system. We have grown through hiring services, research-based training, industry collaboration and organizational transformation. We are part of the Shakti Ecosystem, engineering solutions that respect people and planet.

HEADQUARTERS

Vadodara, Gujarat

WHAT WE DO

Hiring

Lateral, fresher and contractual hiring for engineering teams.

Learning & Development

Research-based training for students and employees.

Culture Transformation

Expert-led, measurable organisational change.

Meet the Director

Ekata Mehul Shah

PRINCIPAL DIRECTOR

Director & Chief Software Architect

25+ YEARS IN GLOBAL SOFTWARE ENGINEERING

- 28+ years across industry and academia; Ph.D. (contd.), M.Tech (ICT), B.E. (Computer)
- Patent holder — digital metering using Zigbee; 25+ international publications, 3 book chapters
- NSDC Master Trainer & SME with NASSCOM / ESSCI; IVLP alumna (US, Women in STEAM)
- Women Entrepreneur Gujarat (GESIA, 2014); Director, Women in Big Data India
- Trained 70,000+ students; built multiple Centres of Excellence and incubation centres
- B.Tech (Computer Science, 1995), NIT Rourkela; Executive MBA, Harvard Business School
- AI / Data Science & Quantum Computing, MIT Boston
- Industry-Academia Anchor, KDEM, Government of Karnataka
- Prior industry experience: IBM USA, AT&T NJ, CNR Corp, eVue
- Serial entrepreneur, startup mentor and angel investor; board member for several companies
- Visionary and catalyst for industry-academia collaboration — instrumental in setting up CoEs and incubation centres

Advisory Board

Senior leaders from industry, academia and philanthropy who guide Orena's direction.

Dr. Bhuvan Unhelkar

Professor of Information Technology
and consultant — Sarasota, Florida.

Dr. Prabhat Ranjan

Vice Chancellor, D Y Patil
International University, Akurdi, Pune.
Former Director, TIFAC.

Mr. Pratul Shroff

Founder of eInfochips. Founder, Dr. K.
R. Shroff Foundation. Philanthropist,
thinker & doer.

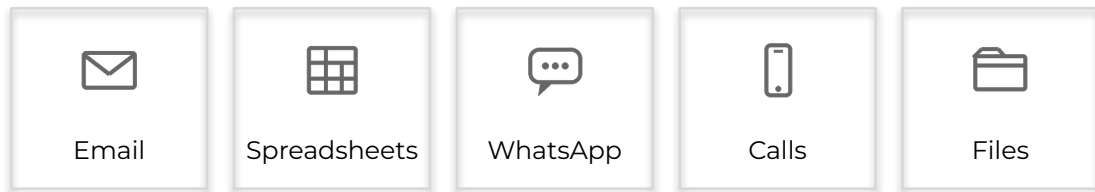

THE PROBLEM

Building engineering talent is scattered across disconnected tools.

When companies hire, train and grow engineering teams, the work runs on email, spreadsheets, chats and calls. No single system holds it together — so progress is invisible and outcomes cannot be measured from one place.

TODAY — THE FRAGMENTED FLOW

NO SHARED SYSTEM OF RECORD

Progress lives in inboxes, sheets and chats — the consultant becomes the only source of truth.

CORE PAIN POINTS

- 01 Manual coordination across stakeholders with no shared system of record
- 02 Progress and outcomes are not measurable from a single place
- 03 Client visibility depends on consultant follow-up, not self-serve data
- 04 No structured way to consolidate hiring, learning and transformation history per client

THE IDEA

One platform that runs the entire talent journey.

Orena is building a Workforce Growth Platform — hiring, learning and culture transformation delivered inside one connected system, where experts and AI work together and every outcome is measurable.

HOW IT WORKS TODAY

Services delivered ad hoc

Email, spreadsheets and WhatsApp

Visibility that depends on a consultant

Tools that dictate the experience

WITH THE ORENA PLATFORM

Services delivered through one connected platform

A single system of record

Client self-serve dashboards and analytics

Technology abstracted behind the platform

Software orchestrates people, workflows and data. Experts keep delivering the judgment-driven work.

THE SOLUTION

Three engines. One platform.

Hiring begins the employee lifecycle, learning develops capability, and culture transformation sustains long-term growth — three engines on one shared foundation.

Hiring

Identify, assess and onboard the right talent.

Lateral · Fresher · Contractual

Learning & Development

Build capability through structured learning, assessment and certification.

Students · Employees

Culture Transformation

Measure and improve engagement, leadership and organisational culture.

Expert-led · Measured

SHARED PLATFORM SERVICES — USED BY EVERY ENGINE

Authentication & role-based access

Analytics & reporting

Document management

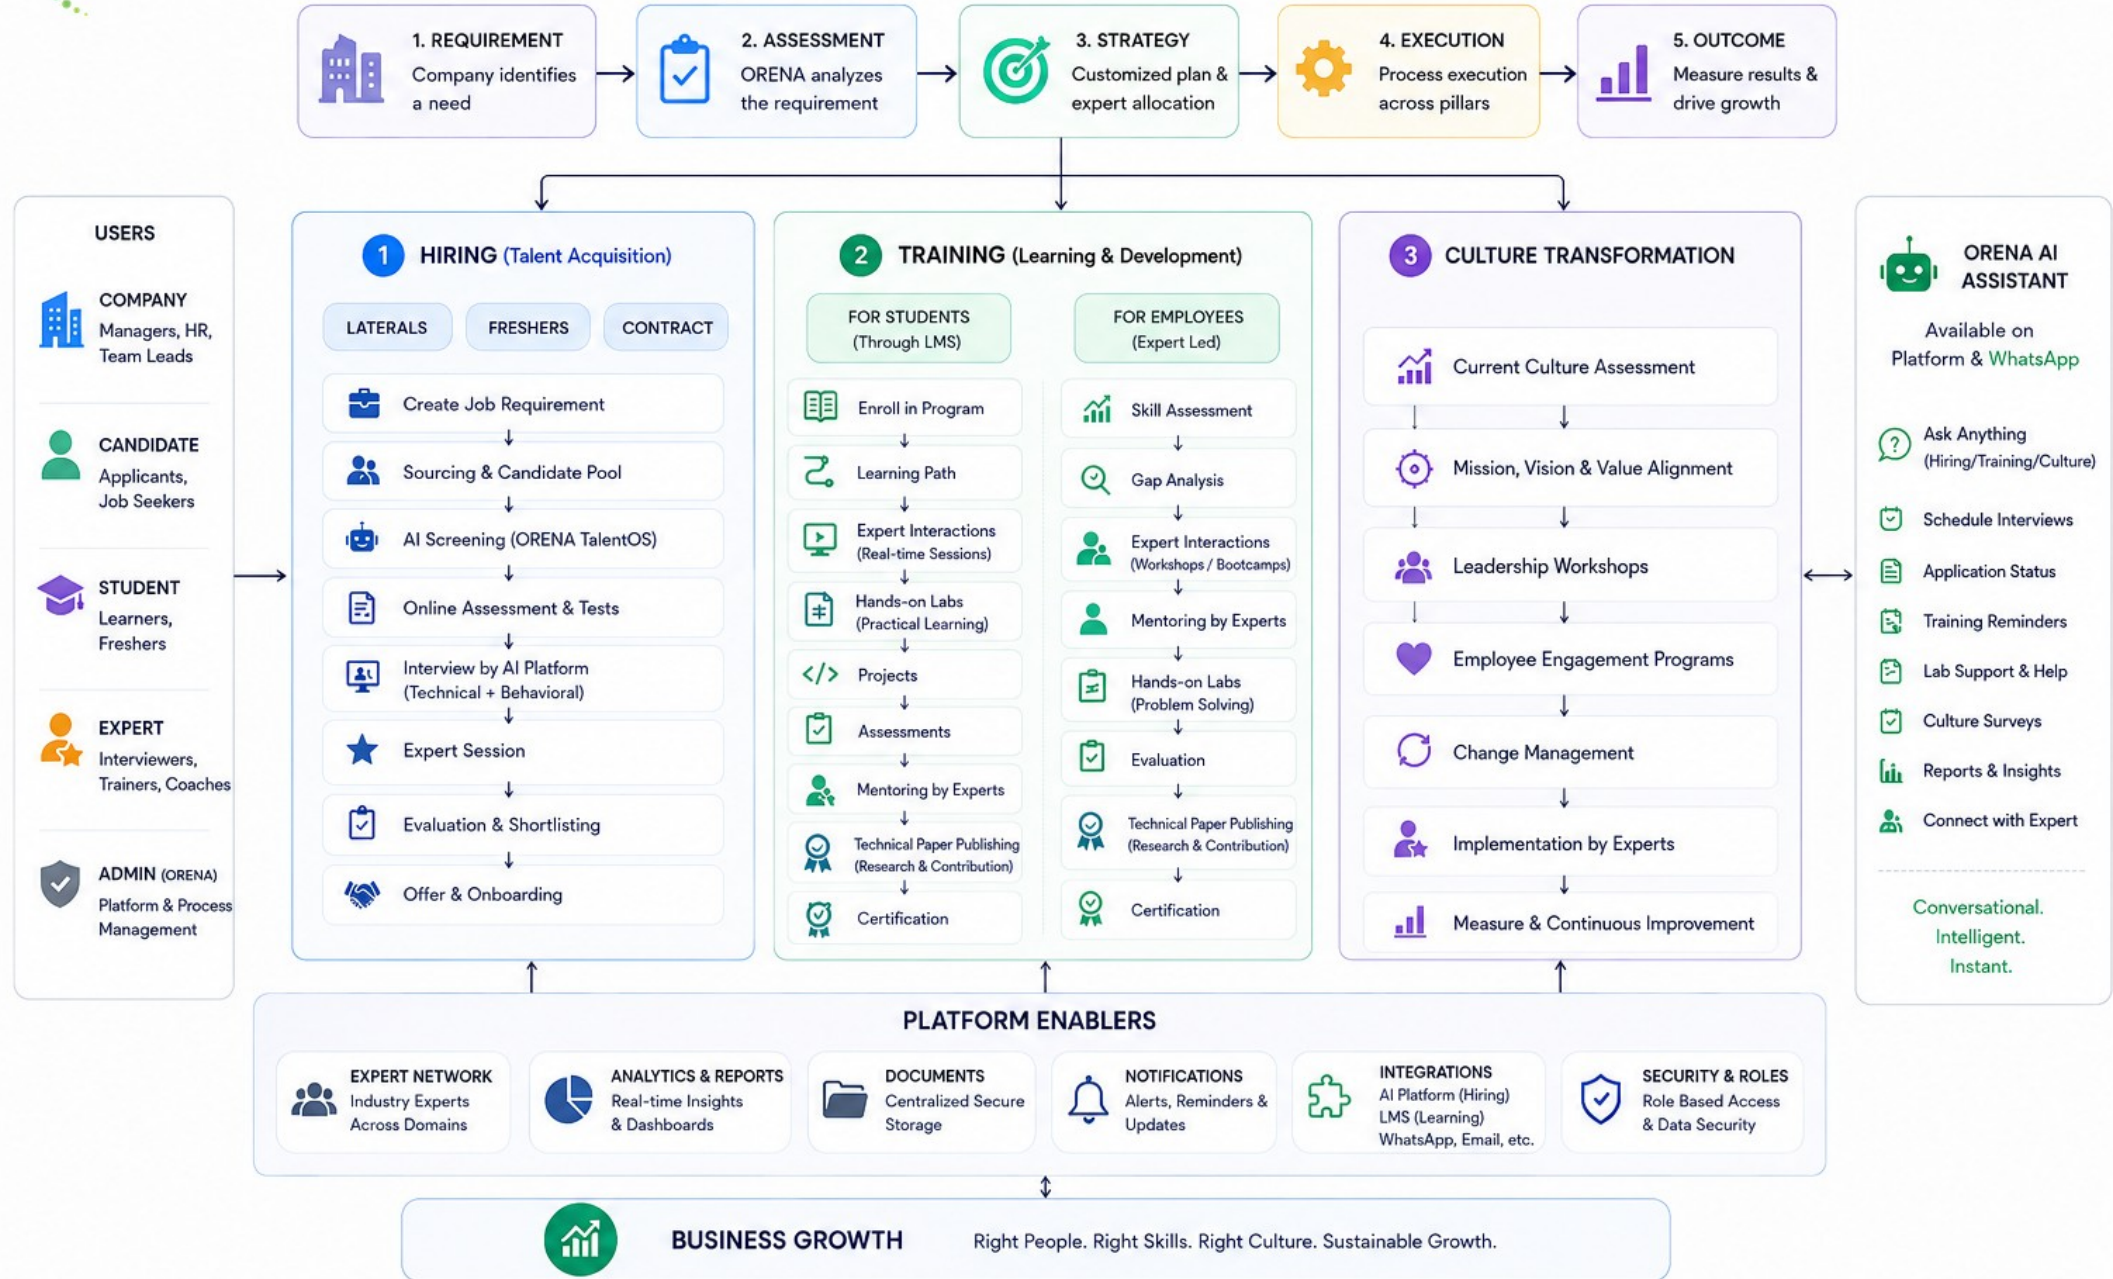

Notifications

AI assistant

ORENA – WORKFORCE GROWTH PLATFORM WORKFLOW

One Platform. Three Core Pillars. Endless Growth.

One Platform

Orena owns the workflow and the relationship. Mentza contributes the AI-powered capability behind it. Branding, navigation, dashboards and workflows stay consistent with the Orena experience — no screen or label exposes Mentza as a separate product.

BUSINESS AREA	ORENA RESPONSIBILITY	MENTZA CONTRIBUTION
Hiring	Experts, recruitment workflow, client management	AI screening, assessments, interview intelligence
Training	Learning programs, workshops, experts	AI coaching, simulations, assessments
Culture	Transformation consulting, workshops	Culture analytics, story collection, AI insights
Analytics	Business reporting	Learning & assessment data
AI Assistant	Unified user interface	Conversation intelligence where applicable

One platform. One talent journey. One connected view.

One dashboard per role — not one report for everyone.

The dashboard is the operational workspace. Each role sees contextual KPIs, active workflows, pending tasks, AI insights and notifications based on permissions.

Super Admin	Platform-wide KPIs, configuration and oversight
Company Admin	Org-level hiring, learning and culture progress
Recruiters	Open requirements, candidate pipelines, interviews
Experts	Assigned engagements and delivery schedule
Trainers	Cohorts, assessments and session schedules
Students	Learning path, assignments and certifications
Candidates	Application status, assessments and interviews

Power the pipeline of preferred engineers.

Our vision is to create an ecosystem that equips, empowers and encourages human talent — so companies grow through the right people, and people grow through relevant, research-based learning and mentoring.

Reliable

We deliver on our word.
Every engagement is built on consistency organizations can plan around.

Forward-thinking

We anticipate where talent and industry are headed, not just where they are today.

People-focused

Every solution starts with the humans it serves — engineers, teams and leaders alike.

Impact-driven

We engineer solutions that create lasting value, not just short-term output.

One platform. One talent journey. One connected view.

Our Services

Seven services, one goal — industry-ready engineering talent and the organizations that keep it growing.

Talent Acquisition

Contract, permanent & freelance hiring,
campus drives, mock interviews.

IP, Patent & Development

Intellectual-property creation, patents and product development.

Making Industry Ready

Research-based training that makes
graduates deployable.

Setting up Research Centres

Design-house and research-centre
setup, team to infrastructure.

Expert Exchange

Named domain experts for interviews, reviews and mentoring.

Executing Industrial Projects

End-to-end delivery of industrial engineering projects.

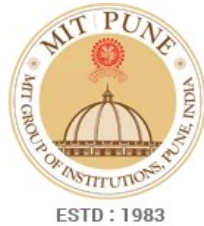

Corporate Workshops

Focused upskilling delivered inside client organizations.

University & Knowledge Partners

Research-based training runs in collaboration with universities — the engine behind industry-ready graduates and the campus hiring pipeline.

PROGRAMS TI University Program · Cypress University Alliance · Board of Studies participation across universities

Domains & Clients

We operate across seven engineering domains, for a client base that spans product companies, design houses and enterprises.

DOMAINS WE SERVE

Embedded
Systems

Automation

Industry 4.0

IT & ITES

E-Commerce

Digitalization

Consumer
Durables

SELECTED CLIENTS — DEVELOPMENT & RECRUITMENT

...plus eInfochips, VVDN Technologies, and Fortune 500 delivery through our global partners.

Global clients through our partner network.

Through our global partner XCEL Solutions Corp, our talent and delivery reach Fortune 500 enterprises across the US, Europe and Latin America.

IBM · SAP · Oracle · Ericsson · Bayer · Ford · HP · Sun Microsystems · The Washington Post · Stanford University · Telcel · and more.

The numbers behind the name.

incubated

Star Companies of Orena

eInfochips

- Around 1,500 of 2,000 eInfochips engineers were trained by our team
- Long-running embedded-domain training partnership

VVDN Technologies

- Initiated the entire design house for VVDN in Gandhinagar
- Recruited a 500-strong team across all 8 design houses PAN India — including sales teams in the US, Canada, Japan and Germany; 450 joined

Let's build the platform.
