

What the wireframe lacks

1. No dispute or cancellation screens

The FRD shows a full process for when work isn't approved — dispute, review, resolve, close. None of it exists in the wireframe.

2. Inspections might be missing a step or two (not sure)

FRD shows 4 steps, wireframe only has 2 screens for it. Could just be combined into one screen — can't tell for sure from the image.

Everything else — Maintenance, Compliance, Rent, Notices, Legal, Property/Tenant, Documents, Messaging — checks out fine.
