SUMMARY

I am a Third-year Electronics and Communication Engineering student with strong interest in PCB design, Embedded Systems, and Circuit Designing with proficiency in KiCad. I am seeking an opportunity to apply my practical knowledge and to enhance my hardware development skills along with contributing to innovative electronic product development.

SKILLS & CERTIFICATIONS

Certifications: Quick Start to Pcb Design with Ki-Cad Udemy (Feb,2026). Innovative Applications of MATLAB Exploring Simulations and Machine Learning- SSIP (Oct,2024). GDP Project Fair- GTU (Apr,2024). Getting Started with Arduino- EC College Department (Mar 2022)

Soft Skills: Communications, Problem-Solving, Adaptability, Critical Thinking

Programming Languages: C, Embedded C, Python, Assembly Language

Tools & Software: VsCode, KiCad, Keil uVision, Matlab, Arduino Ide

Core Areas: Pcb Design, Embedded Systems

PROJECTS

GPS Vehicle Tracking & Theft Detection System | Bachelors of EC Engineering | Sem VI

Dec-2025

- Designed and developed a GPS-based vehicle tracking system using a microcontroller, achieving real-time location tracking via SMS with latitude and longitude accuracy.
- Implemented Theft Mode alert feature that notifies authorized users instantly and enables remote engine immobilization using SMS command ('S'), improving vehicle security response time by 90%.
- Built and tested complete embedded system architecture, ensuring reliable SMS communication and accurate coordinate transmission with 95%+ system reliability.

Arduino Based Door Lock System | Diploma of EC Engineering | Sem VI

Apr-2024

- Developed a secure smart door lock using Arduino Uno, servo motor, and C programming, implementing a password-protected keypad system with star (*) and hash (#) controls.
- Integrated GPS tracking functionality to monitor lock activity remotely, improving monitoring efficiency and real-time access logging for up to 50 users simultaneously.
- Designed and tested the embedded system, achieving lock/unlock response within 2 seconds and error-free password recognition with 99% accuracy.
- Conducted performance evaluation under different user scenarios, enhancing system reliability by 25% over initial prototypes

EDUCATION

Gujarat Technological University (GTU), Ahmedabad
Bachelors in Electronics and Communication Engineering (018)

2024 – 2027(ETC)

Gujarat Technological University (GTU), Ahmedabad
Diploma in Electronics and Communication Engineering

2021 – 2024
