Summary

I am skilled in Embedded Systems, IoT, PCB Design, Robotics, and Microcontroller Programming. Experienced with ESP32, Arduino, Embedded C, sensor interfacing, and hardware-software integration. Passionate about developing real-world automation and smart monitoring solutions using embedded technologies.

Skills

Programming: Embedded C, Python, C/C++ (Basic), HTML, CSS, JavaScript

Embedded Platforms: ESP32, Arduino, Flight Controllers, Microcontrollers

Protocols: UART, SPI, I2C, Wi-Fi, Bluetooth

EDA & Simulation Tools: KiCad, Altium Designer, LTspice, Proteus, Arduino IDE

Core Concepts: Embedded Systems, PCB Design, Circuit Design, Sensor Interfacing, IoT Systems, Robotics, Real-Time Systems

Education

Bachelor of Engineering – Electronics Engineering

Terna Engineering College, Navi Mumbai

Aug 2023 – May 2027

CGPA: 9.02

XII (HSC)

RD National College, Mumbai

2023

58.4%

Relevant Coursework

Digital Electronics, Embedded Systems, Microprocessors, Signals and Systems, IoT, Communication Systems, Robotics, PCB Design, Control Systems

Experience

Android App Developer Intern

CodSoft

June 2024 – July 2024

Remote

- Developed Android applications using HTML, CSS, JavaScript, and Android Studio.
- Designed responsive user interfaces and improved application functionality.

PCB Designer

Miko Electronics

Jan 2026 – Feb 2026

Remote

- Designed PCB layouts and schematics using KiCad and Altium Designer.
- Optimized component placement and routing for embedded electronics circuits.
- Developed compact PCB solutions for IoT and embedded applications.

Embedded System Design Training

Maven Silicon

Dec 2025

Training Program

- Completed training on embedded systems, microcontroller architecture, and interfacing techniques.
- Learned real-time embedded concepts and hardware-software integration.

Projects

IoT Health Monitoring System | *ESP32, Sensors, IoT*

Jan 2026 – May 2026

- Developed an IoT-based healthcare monitoring system for real-time patient parameter tracking.
- Integrated 5+ sensors with ESP32 for wireless monitoring and alert generation.
- Implemented real-time data transmission using Wi-Fi-based IoT communication.

Quadcopter Drone | *Flight Controller, Embedded Systems*

Present

- Designed and developed a quadcopter drone with flight controller integration.
- Implemented RF communication, motor-ESC interfacing, and sensor calibration.
- Worked on drone stabilization and embedded flight control systems.

Frequency Jammer Device | *IC 555 Based*

Jan 2025 – May 2026

- Developed RF signal generation circuit using IC 555 timer and LC tank circuit.
- Explored tunable RF frequency generation and interference concepts.

Student Attendance App | *HTML, CSS, JavaScript*

2024

- Developed web-based attendance management application for student record tracking.
- Implemented attendance monitoring and data management functionalities.
- Improved user accessibility with responsive front-end design.

Position of Responsibility

- **Sponsorship Head** — **EESA, TEC** (Aug 2025 – April 2026)
- **Documentation Head** — **EESA, TEC** (Jan 2025 – July 2025)
- **Documentation Non-Core** — **Resonance, TEC** (Jan 2024 – May 2024)

Achievements & Activities

- Secured 3rd Place in WireX 2.0 conducted by IETE for project **Edges Supply Drone System**.
- Participated in technical hackathons and embedded systems competitions.
- Developed multiple IoT and embedded system projects using ESP32 and Arduino.
- Strong interest in AI/ML integration with embedded and automation systems.
